

Dollars at Work

CPR Training Kits

Children's Miracle Network provides funding for CPR training kits for schools across central Pennsylvania. Each kit includes inflatable dolls, training DVDs, AED training simulators and other tools and materials that enable students and teachers to learn CPR in just one class period.

Why do we need CPR Kits in Schools?

Vigorous exercise during athletic practices and games can trigger sudden cardiac arrest.

Even the best EMS Systems can't reach victims for 3-5 minutes. Without help, survival rates drop 10% per minute.

There are 360,000 sudden cardiac arrest cases each year outside of the hospital and nearly 90% of those victims will die. If bystander CPR is performed quickly, chances of survival may double or even triple!
