You are joining a fast growing number of walk teams across the country! We are excited to see so many taking action together.

“Our 8 year-old Emma, was diagnosed with epilepsy in 2012. In the summer of 2013, my husband, Manny, was also diagnosed with epilepsy. It has been a tough journey, to say the least, but we have faith that we will overcome this. We never know how strong we are until being strong is the only choice we have.”

Knowing the facts about epilepsies and seizures. Sharing your story and epilepsy information will help inspire others to get involved and join you.

Epilepsy is the most common serious brain disorder worldwide with no age, racial, social class, national or geographic boundaries.

Seizures come from the brain, and any brain can have a seizure.

Over the course of a lifetime, 1 in 10 will experience a seizure. 1 in 26 will be diagnosed with epilepsy.

Epilepsy affects 2x more people than cerebral palsy, multiple sclerosis, and Parkinson’s disease – combined.

Epilepsy research gets 10 times less funding to tackle its challenges and find solutions and cures.
