

*I wish to have an  
entertainment package*

Sean, 10  
cancer

Sean was diagnosed with Acute Lymphoblastic Leukemia (ALL) one month before he turned three years old. It was hard leaving the family to travel from Nunavut to Winnipeg for doctor appointments. He was sad he couldn't see his brother and sisters for a while. We stayed in the hospital for one month when he was first diagnosed and found out that Sean immediately needed port surgery. Following his surgery, Sean was hospitalized with the flu while he was undergoing chemo.

The nurses were so nice and made sure that Sean was kept comfortable and safe during his treatments. While we lived in the hotel for 10 months, the staff fell in love with Sean. It was during this time that Sean was referred to Make-A-Wish so that he could receive his most heartfelt wish. Although Sean wanted to travel to a fun destination, he chose the entertainment package instead due to travel restrictions, but he is extremely happy with his choice. He is excited to play his favourite video games on his Playstation and share his joy with his brother and sister.

Thank you to Make-A-Wish and all those who support the great work that they do. Children like Sean go through so much during their diagnosis, so it is amazing when they have a special experience to look forward to – one that brings them so much joy and happiness to persevere and overcome their illness.
