#### HALF CHEST

Take a t-shirt from your existing wardrobe that fits you well. Lay it flat on a table and measure the width from 2cm below the underarm seam. Compare this number to the number in the sizing chart to find the closest fit.

#### SHOULDER POINT (SP) LENGTH

Again, the t-shirt is laid flat and the length is measured from the highest point, which is where the shoulder seam meets the neck, down to the hem.

#### TOLERANCE

In line with generally accepted industry practices, a 5% tolerance in measurements should be allowed when placing your order.
